

## The Hay Monster®!

WE STARTED THE TREND: now with thousands of customers saving money with square feeders we give you the BIGGEST, BADDEST, STRONGEST Hay Feeder EVER made commercially...

## Introducing the Hay Monster!

### Your Bull Has Met his Match!

Constructed of 2-7/8 and 2-3/8" pipe, these feeders are the best you can buy and I don't care what anybody says. As a matter of fact, we not only guarantee these feeders to save alot of hay - *we guarantee you an animal will not tear them up!*

**NEW!** Here it is! Now even less trips to the pasture  
in the winter to feed hay to  
your cattle. We now have the **DOUBLE/TRIPLE BALE  
HAY CONSERVING FEEDERS**  
that hold up to three round hay bales or big square  
hay bales. We also have  
special calf hay feeders for calves and hay saving  
feeders for horses!

I stopped by your booth at the Ozark Fall Farmfest this weekend to tell you about my experience with your Hay Conserver feeders. I was using the unrolling method to feed my cows because I felt it was the efficient way to feed. But I heard a lot about your feeders so I thought I would try one. I bought a Hay Monster Double hay feeder. I went from unrolling two bales every day to using a bale and a half in your feeder. That's about a 30% savings. It allows me to even skip a day every once in a while if I want to. All I can say is everything I heard is true, THEY WORK!
